

SHORT

Stuart W.J. Reid BVMS PhD DVM DipECVPH FRSA FRSE MRCVS

Graduating from the University of Glasgow as a veterinary surgeon in 1987, Reid is Professor of Veterinary Epidemiology and Informatics holding the unique, joint chair between the Universities of Glasgow and Strathclyde since 1997. His research interests are in the application of advanced statistical methods in quantitative epidemiology. With a focus on pathogens of zoonotic and public health significance, activity is directed towards understanding the distribution and dynamics of disease determinants at the population level, at the same time as ensuring engagement with key stakeholders ensuring science-based impact on disease control policy at national and international level. He is currently Dean of the Faculty of Veterinary Medicine at the University of Glasgow.

Stuart W.J. Reid BVMS PhD DVM DipECVPH FRSA FRSE MRCVS

Graduating from the University of Glasgow as a veterinary surgeon in 1987, Reid is Professor of Veterinary Epidemiology and Informatics holding the unique, joint chair between the Universities of Glasgow and Strathclyde since 1997. His research expertise is in quantitative epidemiology applied to human and animal health issues, at all levels of resolution. With a focus on pathogens of zoonotic and public health significance, his efforts are directed towards understanding the distribution and dynamics of disease determinants at the population level, ensuring engagement with key stakeholders and science-based impact on disease control policy at national and international level. He has over 100 publications and over £15M in competitive grants to his name. Previously Associate Dean (Research) and now Dean of the Faculty of Veterinary Medicine at Glasgow, Reid leads one of the world's premier veterinary schools with a commitment to research, education and clinical care.

A veterinarian with experience of the private and public sector, Reid has worked in Africa, the USA, is a Visiting Professor at the University of Sydney, is senior vice president of the European College of Veterinary Public Health and a member of the UK Veterinary Products Committee. He currently serves on the Scottish Science Advisory Committee and was a member of the international scientific steering group of the Danish EpiLab. The first elected President of the European College of Veterinary Public Health, he is currently Honorary Secretary of EAEVE is chairing the Veterinary Legislation Working Group of the RCVS in the UK and served on the Strategic planning group of the AAVMC. He is a Fellow of the Royal Society of Edinburgh, Scotland's National Academy, and sat on the Society's inquiries into Foot and Mouth Disease, Infectious Salmon Anaemia, Avian Influenza and Bluetongue Disease.
